Drafter: Johann Piégad

**USE:**

◦ To place any piece of material in a vertical position: metal or wood formwork panel, concrete blocks, walls of wood-frame houses...

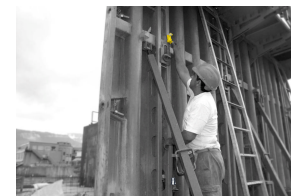

**PRODUCT BENEFITS:**

- Pierced polymer mount • : enables the user to fix the plumb-line to a wall, meaning that it does not need to be held. Frees the user's hands.
- Magnetic support , : to magnetize the plumb-line on a metal formwork panel.
- Thread winding system  $f$ : does not get in the way during use.
- Polymer scraper „ : to clean (concrete residues, formwork oil...) the form panel before magnetizing the plumb-line.
- 8-m nylon thread:
  - water resistant.
  - long thread = 8 m.
- Plumb bob clips onto the mount: easy to store.

- Bright yellow color easy to spot on the building site.
- Weight = 500 g (vs 320 g for the Noviplon Stanley plumb-line): better stability in case of wind.
- Chromed lead: better resistance to corrosion.

**MARKETING:**

- Registered pattern.
- Design tool: "Observeur du Design" 2011 label.
- Tool developed in partnership with large companies in the building sector (Bouygues).
- 5-year warranty against any manufacturing defect in normal conditions of use, wear excluded.
- Date of availability: **February 2011**
- Plumb-line in set of 4: 144773
